The Witness and the Other World Mary Baine Campbell 2018-08-06
Surveying exotic travel writing in Europe from late antiquity to the age of discover, The Witness and the Other World illustrates the fundamental human desire to change places, if only in the imagination. Mary B. Campbell looks at works by pilgrims, crusaders, merchants, discoverers, even armchair fantasists such as Mandeville, as well as the writings of Marco Polo, Columbus, and Walter Raleigh. According to Campbell, these travel accounts are exotic because they bear witness to alienated experiences; European travelers, while claiming to relate fact, were often passing on monstrous projections. She contends that their writing not only documented but also made possible the conquest of the peoples whom she travelers described, and she shows how travel literature contributed to the genesis of the modern novel and the modern life sciences.

Coral Reefs of the USA Bernhard M. Riegl 2008-03-21 Coral Reefs of the USA provides a complete overview of the present status of knowledge regarding all coral reef areas within the USA and its territories. It is written by the most experienced authorities in their fields and geographic areas. Stretching from the Caribbean to the western Pacific, the coral reefs of the USA span extensive geographic and biotic diversity, occur in a wide variety of geomorphological settings, and provide a representative cross-section of Holocene reef-building. This book will therefore be of broad general interest. For the first time, complete scholarly reviews are given for the geology, geomorphology and the biology of reefs encompassing a vast area stretching from the Mariana Islands in the west, Samoa in the south, Hawaii in the north and the Virgin Islands in the east. This book is not a status report, but will provide up-to-date information about stressors and the biotic responses of the reefs, as well as the geological explanations why these reefs exist in the first place. It will be an invaluable baseline-reference for all those who are engaged in research or management of these coral reefs or to those who simply enjoy being well-informed about one of the most iconic ecosystems of the USA.

[A History of the Virgin Islands of the United States](#) Isaac Dookhan 1994
The Virgin Islands in the course of centuries have witnessed the coming and going of Ciboney, Arawak and Carib peoples, European discovery by Christopher Columbus, temporary occupation by pirates and adventurers, colonization, commercial and plantation development by Danes and other North European settlers, African slavery and its abolition, American purchase, colonial government, social and political change, and in recent years remarkable tourist and industrial developments. These and other topics have been narrated and interpreted by Dr. Isaac Dookhan in this first comprehensive history of the U.S. Virgin Islands. Dr. Dookhan is eminently well qualified for this undertaking. He was born in the British colony of British Guiana, now independent Guyana, where he was educated in the public schools and served as teacher and headmaster. The author has drawn upon primary and secondary sources in recounting the experience of the Virgin Islands and their peoples. He is concerned with successive waves of immigrants, how they affected the physical environment and cultural life of the islands, the impact of international wars and politics, commodity price movements, and technological changes.

The Unknown Leonardo Ladislao Reti 1990 To know Leonardo da Vinci is to be in communion with an extraordinary mind for whom the normal limitations of time, place, history, and even the human condition itself scarcely existed. The Unknown Leonardo not only brings us closer to Leonardo the man but gives us access as well to Leonardo the genius. In this book ten of the world's leading Vincian scholars illuminate all aspects of Leonardo's multifaceted brilliance. It contains over 800 spectacular illustrations and reproductions, 85 in color. Through an imaginative use of graphics and captions, Leonardo's inventions and ideas are made clear to both the eye and the mind. A pictorial biography, which opens the book, sets the stage linking the highlights of Leonardo's life and work to the cultural and political events of his time. Then, the wide spectrum of his thought and activity is fully explored. The authors examine in turn Leonardo's great paintings, his literary legacy, his innovations in artistic theory, his designs for musical instruments, his new ideas in military architecture, his machines and weaponry, his insights into the mechanics of water and stone, his designs for clockworks, and his ingenious plan to cast a giant equestrian statue in bronze by a revolutionary process. Ladislao Reti, the book's editor, presents exciting discoveries from the Madrid Codices--one of the most important manuscript finds of the century--that unquestionably establish Leonardo as the greatest scientist and technologist of his era. This book is an adventure, an experience, and a possession of beauty. It will delight anyone who is interested in art, science, technology, the Italian Renaissance, or the potentialities of the human mind.--Book jacket flap.

Buried by the Times Laurel Leff 2005-03-21 An in-depth look at how The New York Times failed in its coverage of the fate of European Jews from 1939-45. It examines how the decisions that were made at The Times ultimately resulted in the minimizing and misunderstanding of modern history's worst genocide. Laurel Leff, a veteran journalist and professor of journalism, recounts how personal relationships at the newspaper, the assimilationist tendencies of The Times' Jewish owner, and the ethos of mid-century America, all led The Times to consistently downplay news of the Holocaust. It recalls how news of Hitler's 'final solution' was hidden from readers and - because of the newspaper's influence on other media - from America at large. *Buried by The Times* is required reading for anyone interested in America's response to the Holocaust and for anyone curious about how journalists determine what is newsworthy.

A Macao Narrative Austin Coates 2009-07-01 Macao, 40 miles west of Hong Kong, became a place of Portuguese residence between 1555-57. In this short, lively and affectionate book, Austin Coates explains how and why the Portuguese came to the Far East, and how they peacefully settled in Macao with tacit Chinese goodwill. Macao's golden age, from 1557 to the disastrous collapse of 1641, is vividly reconstructed. There follows the cuckoo-in-the-nest situation of the late eighteenth century when the British in Macao were a law unto themselves, until the foundation of Hong Kong and the opening of Shanghai gave wider scope for their energies. Portugal's subsequent struggle to obtain full sovereignty in Macao, and the extraordinary outcome in 1975, brings this account to a close. Special tribute is paid to the risks Macao gallantly undertook in harbouring Hong Kong's starving and destitute during World War II.

Eliot Ness Douglas Perry 2015-03-31 The story of Eliot Ness, the legendary lawman who led the Untouchables, took on Al Capone, and saved a city's soul As leader of an unprecedented crime-busting squad, twenty-eight-year-old Eliot Ness won fame for taking on notorious mobster Al Capone. But the Untouchables' daring raids were only the beginning of Ness's unlikely story. This new biography grapples with the charismatic lawman's complicated, largely forgotten legacy. Perry chronicles Ness's days in Chicago as well as his spectacular second act in Cleveland, where he achieved his greatest success: purging the profoundly corrupt city and forging new practices that changed police

work across the country. He also faced one of his greatest challenges: a mysterious serial killer known as the Torso Murderer. Capturing the first complete portrait of the real Eliot Ness, Perry brings to life an unorthodox man who believed in the integrity of law and the power of American justice.

Learning about Trees and Plants Gail Karlsson 2016-10-01 This project supported by the Unitarian Universalist Fellowship of St. John, in the US Virgin Islands, is meant to help both residents and visitors in identifying and learning about the local trees and plants. Part 1 points out some of the notable trees in the Cruz Bay area, and includes a map that shows the sections of town referred to, so people can walk around and use the book to identify particular trees. Part 2 presents photographs of trees and

plants grouped by distinguishing characteristics that ordinary people can easily recognize, such as flowers, fruits or thorns. It also identifies some potentially dangerous ones. One of the key Unitarian Universalist principles is: "Respect for the interdependent web of all existence of which we are a part." Trees and plants, whether native or introduced, help define the unique experience of life in this place, and as we learn more about them we develop a greater appreciation for their complexity and value. In the course of the project, we learned that many native trees are currently threatened by a combination of factors, including droughts, deer grazing, development projects and imported pests. We hope that the information in this book encourages people to pay more attention to the native trees and plants, and to assist in preserving them.
